UNDERSTANDING FINANCIAL STATEMENTS FOR IN-HOUSE COUNSEL

FRIDAY, 20 FEBRUARY 2026
8.00AM TO 10.00AM

\$305
WEB262N21

Financial literacy is an essential skill for today's in-house lawyers. This practical and engaging workshop unpacks the fundamentals of accounting and financial reporting, giving legal professionals the tools to interpret financial statements with confidence. Through clear explanations and real-world examples and led by experienced and expert forensic accountants you will explore how different accounting methods affect reported results, how to identify red flags and gaps in information and how to ensure that financial data informs your sound legal and commercial decision-making.

UNDERSTANDING FINANCIAL STATEMENTS FOR IN-HOUSE COUNSEL

For in-house lawyers, financial literacy is no longer optional — it's essential.

Financial statements underpin almost every aspect of corporate decision-making, from assessing commercial risk and negotiating contracts to advising on director duties, solvency, and compliance. Yet many lawyers only scratch the surface of what these documents reveal.

Whilst financial statements may seem simple on first glance, there is far greater detail beyond the key pages we immediately turn to. In this interactive and practical workshop, Carissa and Shannon will demystify the numbers and explain how to interpret financial information with confidence.

Using real-world examples, they'll show how financial statements can both illuminate and obscure the true performance and position of a business — and how in-house counsel can use this understanding to provide sharper, more commercially attuned advice.

- What are the fundamental basics of accounting?
- What are "debits" and "credits"?
- How financial statements are prepared and the key documents behind them
- Interpreting profit & loss statements and balance sheets, and shortfalls in information you may encounter
- How selecting differing accounting methods will impact reported financial performance and position

MEET YOUR PRESENTERS:

Carissa Lacey is a Director at Vincents with over 13 years' experience specialising in forensic accounting, business valuations, and financial analysis for economic loss assessments and class actions. Carissa is a Chartered Accountant and an accredited Business Valuation Specialist. Carissa undertook training in Collaborative Practice in 2016. IMMIGRATION LAW CONFERENCE 2026

FRIDAY, 6 MARCH 2026
8.00AM TO 4.15PM

\$795
263N33

Where is migration law heading through 2026? Record caseloads, tighter compliance, delays, new Ministerial Guidelines and legal alerts are constantly reshaping the practice. Migration practitioners are adapting fast, carrying the weight of clients whose futures depend on them, often navigating cultural and linguistic barriers along the way. Returning by popular demand after last year's sold-out success, this year's conference brings together judges from the Federal Circuit and Family Court of Australia, leading barristers and solicitors to share frontline insights and strategies. Gain practical guidance to manage new visa policies, compliance risks and complex cases - from PIC 4020 refusals and employer sanctions to Tribunal strategy, ethics and character cancellations.

AFTER NZYQ: ADVERSE INDIRECT CONSEQUENCES IN AUSTRALIAN CHARACTER AND STATUS DECISION-MAKING

- Discuss that after NZYQ, decision-makers correctly accept detention's constitutional limits but undervalue the foreseeable burdens of community-based control in ss 501/501CA decisions, with Directions 99/110 and LPDT-style materiality insulating errors (notably around curfews and electronic monitoring)
- Explore the call for integrating those post-release burdens into the "legal consequences" analysis—supported by close readings of recent reasons (including AJN23 and the s 197C/third-country interface)—to recalibrate guidance and judicial review.

ADMINISTRATIVE DECISION-MAKING – HOW TO AVOID COMMON ERRORS

All sorts of government bodies make 'administrative' decisions, or decisions in a statutory context. Decision-makers need to be aware of such a statutory context before they make these kinds of decisions. Common errors in administrative decision-making tend to come from an overreliance on policy or practice, a lack of understanding of the nature of authority, and even a fear of the legislation itself. By learning to re-focus, decision-makers can gain confidence and improve the quality and lawfulness of their decision-making.
