UNDERSTANDING FINANCIAL STATEMENTS FOR IN-HOUSE COUNSEL

FRIDAY, 20 FEBRUARY 2026
6.00AM TO 8.00AM

\$305
WEB262N21

Financial literacy is an essential skill for today's in-house lawyers. This practical and engaging workshop unpacks the fundamentals of accounting and financial reporting, giving legal professionals the tools to interpret financial statements with confidence. Through clear explanations and real-world examples and led by experienced and expert forensic accountants you will explore how different accounting methods affect reported results, how to identify red flags and gaps in information and how to ensure that financial data informs your sound legal and commercial decision-making.

UNDERSTANDING FINANCIAL STATEMENTS FOR IN-HOUSE COUNSEL

For in-house lawyers, financial literacy is no longer optional — it's essential.

Financial statements underpin almost every aspect of corporate decision-making, from assessing commercial risk and negotiating contracts to advising on director duties, solvency, and compliance. Yet many lawyers only scratch the surface of what these documents reveal.

Whilst financial statements may seem simple on first glance, there is far greater detail beyond the key pages we immediately turn to. In this interactive and practical workshop, Carissa and Shannon will demystify the numbers and explain how to interpret financial information with confidence.

Using real-world examples, they'll show how financial statements can both illuminate and obscure the true performance and position of a business — and how in-house counsel can use this understanding to provide sharper, more commercially attuned advice.

- What are the fundamental basics of accounting?
- What are "debits" and "credits"?
- How financial statements are prepared and the key documents behind them
- Interpreting profit & loss statements and balance sheets, and shortfalls in information you may encounter
- How selecting differing accounting methods will impact reported financial performance and position

MEET YOUR PRESENTERS:

Carissa Lacey is a Director at Vincents with over 13 years' experience specialising in forensic accounting, business valuations, and financial analysis for economic loss assessments and class actions. Carissa is a Chartered Accountant and an accredited Business Valuation Specialist. Carissa undertook training in Collaborative Practice in 2016. Carissa frequently delivers accounting and business valuation training to various law firms to bridge the gap between accounting expertise and its practical application in legal proceedings.

Shannon Walker is a Director at Vincents with over 13 years of accounting experience, the last 9 years of which have been specialising in business valuations and forensic accounting. Shannon is a Chartered Accountant and accredited Business Valuation Specialist with CAANZ

DEFENDING UNPOPULAR CAUSES: LEGAL AND ETHICAL ISSUES IN SMOKING AND TOBACCO LAW

A recent addition to list of areas in which criminal lawyers may now have to be conversant is the comparatively arcane area of Tobacco Law. Whilst for many years we have had to deal with the illegal importation, sale and supply of drugs; the illegal importation and dissemination of tobacco (a completely legal substance) is a comparatively novel area of practice. The rapidly escalating price of legal tobacco products has created a near prohibition scenario in the community. Undercutting legitimate vendors has seen the emergence of a niche underworld industry previously unknown; which has created an interesting array of issues for government, courts, police, and lawyers. Deal with a number of issues that have arisen comparatively recently in this field, including:

- When does the exorbitant price of a product effectively create a state of prohibition. And does it work?
- What range of penalties at a State and Federal level apply to importers, distributors, vendors and users of illegal cigarettes and other tobacco products?
- What sort of penalties are the Courts currently imposing?
- What is the legal status of vaping?
- If there is an answer to the increased illegal activity in the sector, is this best achieved through policing, legislation, pricing or judicial penalties?

This exposition of these and other related issues is an Australian first and should not be missed.
